Jaipur, Rajasthan, India

PROFESSIONAL SUMMARY

Microsoft, Nutanix, Fortinet, IBM AI, and Microsoft Badge-certified Computer Science (AI & ML) student with a strong foundation in Artificial Intelligence, Machine Learning, Cloud Computing, and Cybersecurity. Skilled in Python, SQL, Web Development, and AI-powered solutions, with hands-on experience in cloud and software development projects. Passionate about leveraging emerging technologies to solve real-world problems and contribute to innovative AI/ML and cloud-driven solutions.

EDUCATION

Chandigarh University <i>Bachelor of Technology in Computer Science and Engineering (AI & ML Specialization)</i>	Uttar Pradesh, India July 2025 – July 2029
--	---

PROFESSIONAL EXPERIENCE

- Completed a 30-day online internship, gaining hands-on experience in software development and industry-oriented projects.
- Applied programming and problem-solving skills to complete assigned tasks and project deliverables within deadlines.
- Designed and implemented a multilingual text translation application using Microsoft Azure AI Translator Service.
- Integrated AI services to automate content generation and improve user productivity.

PROJECT

Student Portfolio & Achievement Platform

Built a responsive full-stack portfolio platform using React, Tailwind CSS, FastAPI, and MySQL that allows students to showcase their projects, certifications, technical skills, and achievements. The platform includes secure authentication, profile management, project and certificate management, and a dynamic dashboard with search and filtering capabilities. It provides a modern user experience while demonstrating full-stack development, API integration, and database management skills.

AI Document Intelligence System

Developed a Document Intelligence application using React.js for the frontend and Python Flask for the backend to extract and process information from uploaded documents. The project integrates Azure Document Intelligence and OCR-based text extraction to handle printed and handwritten content from PDFs and scanned files. It also includes smart search, voice search, translation, and chatbot support to improve document accessibility and user interaction. The system was designed to convert unstructured documents into searchable and structured data with a simple and responsive user interface.

TECHNICAL SKILLS

Programming & Development: Python(Fast API, Rest API), Data Structure Algorithm with C/C++, Web Development, (HTML/CSS, React, React.js, Node.js And Java Script)
AI & Machine Learning: Azure Cognitive Services, Computer Vision Applications, Generative AI, Nutanix AI Platform, LLMs, Prompt Engineering, NLP Basics
Cloud & Infrastructure: Microsoft Azure, Microsoft Fabric, Fortinet Platform, Compute Engine Load Balancing, **Automation & Orchestration:** Nutanix Calm, Cloud Automation, Infrastructure Automation
Data Engineering: Microsoft Fabric Data Engineering, Data Fundamentals
Tools & Platforms: Azure Portal, Microsoft Fabric, Google Cloud Console
Databases: MongoDB, MySQL

SOFT SKILLS

Creative Problem Solving | Team Collaboration | Communication Skills | Project Management | Time Management | Analytical Thinking | Adaptability | Critical Thinking.

CERTIFICATIONS

Cloud & Infrastructure:

- Microsoft Certified: Azure AI Fundamentals (AI-900) – Microsoft
- IBM AI Fundamentals – IBM
- Fortinet Certified: Introduction to the Threat Landscape 3.0 – Fortinet Training Institute
- Nutanix Certified Professional – Nutanix
- Microsoft Applied Skills & Badges – Microsoft Learn
- Nutanix Certified Professional – Multicloud Infrastructure 6 – Nutanix

AI & Machine Learning:

- Build a Computer Vision App with Azure Cognitive Services – Microsoft Azure & Google Cloud Console

Data & Analytics:

- Data Fundamentals Certification
- Data Analysis Using Python – IBM

ADDITIONAL INFORMATION

Interests: Football, Technology Innovation, AI Ethics, Digital Marketing Trends

Languages: English (Professional), Hindi (Native)

Availability: Open to internships, entry-level positions, and freelance opportunities in AI/ML, cloud automation, or infrastructure engineering domains.
